

REMARKS

A restriction requirement was posed as between Invention I (Claims 1-10) and Invention II (Claims 11-20) under 35 U.S.C. 121 as being independent or distinct inventions. The objection was that the process for using the product as claimed can be practiced with another materially different product; specifically the method does not require a controller in the AED to provide the help. In response, Invention I (Claims 1-10) are elected without traverse. In addition, Claim 11 has been amended to be dependent on Claim 1. It is respectfully submitted that Claims 2-20 are now all dependent on Claim 1 and directed to the same invention.

In light of the foregoing amendment and remarks, it is respectfully submitted that this application is now in condition for allowance. Favorable reconsideration is respectfully requested.

Respectfully submitted,

KIM HANSEN
